Major in Software Engineering and Computer Science

Graduation 2008

SACRED HEART COLLEGE

WACE Certificate

Applicable Maths, Physics, English, Chemistry, Engineering Studies

## EXPERIENCE

2016 - Current

Website Maintenance

Lady M Luxury Cruises

Fremantle

Responsible for updating and maintaining the company website.

This involves updates, adding new content and editing photos.

A static site built with HTML and CSS with updates done through FTP.

*HTML, CSS, JavaScript, FTP, Photoshop.*

2015

GENERAL IT & DATA ENTRY

L&H Electrical

Wangara

Assisted with the entry of data from sales invoices into Microsoft

Excel spreadsheets. Helped with the installation and troubleshooting

of business software and answering any computer related queries

from colleagues.

## UNIVERSITY PROJECTS

.NET, ASP.NET, C#, SQL

Product Ordering System

A functional and validated data processing system created by exploiting the rapid application development features of .NET which allowed for inputting, searching, editing, deleting stored data through forms.

.NET, C#, WinForms, SQL

Image Server / Client

A database driven application that allows users to either upload Images, moderate images or administrate accounts depending on their appointed role. Images are stored in an SQL database as a BLOB.

## OTHER PROJECTS

HTML, CSS, JavaScript, JQuery,

PHP, October, Materialize CSS

New Lady M Website

Built using October a content management system that runs on Laravel.

A heavily modified theme with custom JavaScript and PHP components.

Still in development and soon to be released.

Phaser, HTML5, JavaScript

2D HTML5 Games

Games include Flappy bird, Breakout and my own game Colour Wheel.

Phaser allows them to be mobile friendly and run in a browser.
